About me

I have a bachelor degree from Coventry University in Fine Arts. I speak English and Russian fluently and learning German. I love to travel, cooking, meeting new people, art and web development. In 2017 I opened a hostel in my hometown Almaty. Since 2018 while working in hostel I started learning frontend development and a year later I started working in Rocket Firm. I’m planning to move to Berlin in few months to reunite with my partner.
